

ANOTHER HAPPY BRIGGS HIRE CUSTOMER: GRENCORE, NORTHAMPTON

"We were using long term contracts for our lifting and handling equipment and because our need for more diverse equipment grew, this arrangement was proving very costly. Due to fluctuating demand, Briggs identified that a more flexible and cost effective way of maintaining productivity was to introduce the very same standard of equipment Grencore had been used to, but on a short term hire basis. Briggs have really helped us out with all kinds of machinery. We would have struggled to source such diverse equipment independently via multiple providers."

ANOTHER HAPPY BRIGGS HIRE CUSTOMER: GES

"There are plenty of materials handling suppliers out there, of course, but Briggs Equipment does so much more than drop off and collect machines. We get the latest specification trucks at competitive prices backed by truly exceptional service. Briggs gives us a complete solution that we really value so we never feel the need to use any other suppliers. We're always operating to strict deadlines, which can make for a highly pressured environment, luckily no job is too small for Briggs. Also, because of its huge fleet and regional capabilities, we can rely on Briggs to make sure the right equipment is in situ at the appointed time. That's a huge weight off my shoulders, especially when we need to place an order with little advance warning so there is next to no lead time. In fact, nine and a half times out of ten, Briggs is able to satisfy our requirements at extremely short notice."

- What charger is required, single or three phase?
- What capacity is required?
- What fork length is required?
- What lift height is required?

SHORT TERM HIRE
