

## Lesters Packaging go from strength to strength with Briggs support

### SITUATION

Lesters Packaging are specialists in the design and production of heavy-duty corrugated cardboard packaging solutions and operate several sites across the Midlands.

To help manage an increase in activity and deliveries on-site, Lesters required an update to their existing fleet.

### SOLUTION

Briggs was able to quickly assess the fleet activity and accurately determine an appropriate, future proofed solution.

The Yale Series-N trucks were chosen because of their capability to work effectively within busy environments, whilst also providing improved comfort and safety to their operators.

### RESULT

The team at Lesters are delighted with their new Yale Series-N forklifts, which have already started to have a positive impact on-site!

Dave Mooney, Regional Sales Executive: commented: "We've built a fantastic relationship with Lesters over the years and have worked closely to understand their specific requirements and provide solutions that tick every box.

"Their motivation to work with Briggs comes from our ability to go above and beyond in how we can manage their fleet, flex with their requirements and ultimately deliver a top quality product.

### At a Glance

- Long-term partnership
- Latest Yale Series-N forklifts delivered
- Improved operator comfort
- Greater precision when performing loading tasks
- Safety features and attachments included

"We have been working with Briggs for several years now and always been delighted with the quality of their service and the reliability of the trucks.

"When it came to upgrading our existing forklifts, I had no hesitation in speaking to Briggs. The process has been smooth and the new FLT's are going to be a great addition to our fleet.
